

Battery Storage Systems for Construction and Industry

Our Commitment to help with Energy Cost
and Power Supply Security

By using our energy storage solutions to store and use your self-generated energy, you can reduce your energy costs and also counteract power fluctuations or failures.

Battery Energy Storage

JST STORE 233 kWh 400 V

Our **OUTDOOR** solution with intelligent
EMS software (Energy Management System)

Your Energy Solution for:

- Optimisation of self-consumption
- Peak shaving
- Battery-backup / emergency power
- Stabilisation of the power supply
- Increase grid connection capacity
- E-mobility / charging infrastructure

Battery Energy Storage

JST STORE 466 kWh 400V

Our **OUTDOOR** solution with intelligent
EMS (Energy Management System)

**Become more independent of the public
power supply and take a big step towards
self-sufficiency!**

- **Best price / performance ratio** directly from the manufacturer
- **5-year warranty**
- Commissioning / service / customer service from factory-trained technicians
