Cast Resin Transformers

Environmentally friendly dry-type solution with a robust structure for harsh environments

Cast epoxy resin transformers are highest on the evolutionary scale of transformer design and offer the best combination of electrical and mechanical performance factors. The robust structure—achieved by casting the windings in a solid shell of epoxy—provides mechanical strength unsurpassed by any other transformer available on the market. Cast resin transformers offer increased safety and can help to achieve environmental and sustainability goals set forth by many industries.

- Designed for use in harsh and hazardous environments
- Eco-friendly, low maintenance, no-oil design
- Flame-retardant, self-extinguishing insulation system for maximum safety
- Compact design for space savings

APPLICATIONS

- Utility
- Commercial & Industrial
- Oil & Gas
- Renewable Energy

KEY SPECIFICATIONS

- Voltage level: Up to 72 kV
- BIL: Up to 200 kV
- Ratings: Up to 45 MVA
- Meets GB1094, IEC 60076, UL 1562 and IEEE C57.12.01 requirements

About JST Power Equipment

At JST Power Equipment, we pride ourselves on delivering world-class transformer and electrical equipment solutions. The key to our success is the ability to provide quality products with speed and precision through the dedication of our talented team.

For over 30 years, we've evolved to become an innovator in the electrical industry and we work hard to design and build our products to the highest quality standards. And as we look toward the future, we're continuously investing in our technology, facilities and people to engineer the best solutions in the industry and create more value for our customers.

At JST we're more than a manufacturer, we're transforming the future of power.
