# Small Power Transformers

Optimum power distribution for  
medium voltage ranges up to 60 MVA

Introducing our newest line of oil transformers, JST's small power transformers are engineered to meet the needs of the North American market.

Our solution is designed to handle low to medium voltage ranges and power levels up to 60 MVA, with the capacity to operate under harsh industrial conditions and the flexibility to adapt to specific technical requirements. Our small power transformers provide smooth operation of industrial equipment with optimized performance and reduced operational costs.

The compact size allows for easy integration into various systems and our reputation for robust construction ensures durability and minimal maintenance.

## APPLICATIONS

- Wind Power
- Solar Power
- Transmission & Distribution Substations
- Power Plants (Unit Auxiliary Transformers)
- Industrial Substations

## KEY SPECIFICATIONS

- Power ratings: 5 MVA – 60 MVA (max with fans)
- Primary voltage: Up to 161 kV (650 kV BIL)
- Dielectric coolant: Mineral oil/natural ester/synthetic ester
- Maximum manufacturing weight: 50 tons
- Industry-leading lead time: Approx. 38 weeks
- Built to IEEE, IEC, GB/T and ANSI standards
- No load and load tap changer available

# About JST Power Equipment

At JST Power Equipment, we pride ourselves on delivering world-class transformer and electrical equipment solutions. The key to our success is the ability to provide quality products with speed and precision through the dedication of our talented team.

For over 30 years, we've evolved to become an innovator in the electrical industry and we work hard to design and build our products to the highest quality standards. And as we look toward the future, we're continuously investing in our technology, facilities and people to engineer the best solutions in the industry and create more value for our customers.

*At JST we're more than a manufacturer, we're transforming the future of power.*
